THRILLING ADVENTURE. We heard the other day a story related by an old sailor, Capt. Jacob , which made a great impression upon us, and which we wish we could repeat with the unction and nautical phraseology of the worthy narrator. It occurred during the late war. The cap.

tain, who was a native of Plymouth, was running on the coast in a schooner-loaded with flour. He had nearly reached his destination, when he was overhauled by the enemy's frigate, who ordered him peremptorily to heave a line aboard. There was no resisting the command, for the schooner was without arms, and the tender full of marines and sailors, armed to the teeth with pistols, muskets and cutlasses. The captain had a light but fair breeze aloft; his sails drew, and he was driving near a reef, the entrance to which he was perfectly familar with, and once inside of which, he was sure of making port, undisturbed by the tender.

In this view he ordered one of his men forward with a line, in a clear, stentorian voice, perfectly audible on board the tender, sung

"Heave your line aboard !" then added, in a whisper, so as to be heard only by his men,

"Heave it short !" The Yankee sailor caught the hint, and "hove" according to directions. The end of

the line fell splashing in the water. High above the execrations of the English officer commanding the tender, rose the roar of the indignant Yankee skipper.

"Is that the way to heave a line, you lubberly son of a land crab? Heave the line shipshape, you lubber, or I'll cut your liver out. Heave it short !"

Again the line fell short, and the English officer and Yankee captain vied with each other in showering imprecations and invec-tives on the head of the blundering "land

The Englishman began to smell a rat, and just as the Yackee skipper threw himself flat on the deck, and made his men follow his example, the report of a dozen muskets was heard, and a shower of bullets came whistling through the rigging.

"Let them fire and be darned! said the Yankee, 'I'll show him a clean pair of heels." And taking his tiller between his heels, as he lay upon the deck, he ran the schooner eleverly inside of the reef.

They were soon out of gun shot from the baffled tender. Up went the stars and stripes, and with a hearty cheer from the mariners. an old one-eyed sea-dog pulled out the fife, and gave them Yankee Doodle in strains as melodious as the triumphant notes of a porker that has escaped the butcher's knife. Captain Jacob saved his bacon and his flour too .- Maine Democrat.

In this medicine several innocent but very potent articles of the vegetable kingdom are united, forming a compound entirely different in its character and properties from any other preparation, and unrivalled in its operation on the system when laboring under disease. It should be in the hands of every person, who, by business, or general course of life, is predisposed to the very many alliments that render life a curse, instead of a blessing, and so often result in death.

FOR SCROFULA

Qr. Drake's Panacea is recommended as a certain remedy. Not one instance of its infine has ever occurred when freely used! It cures the discuse and at the same time imparts vigor to the whole system. Scrofalous persons can never pay two much attention to the state of their blood. Its parification should be their first aim; for perseverance will accomplish a cure of EVEN HEREDITARY disease.

CONSUMPTION CAN BE CERED.—Coughs, Catarrh, Bronchéile, Spitting of Blood, Asthum, Difficult or profuse Expectoration, Heetic Flush, Night Sweats, Pain in the side &c. have been cured, and can be with as much certainty as any other disease. A specific has long been sought for, but in vain until the discovery of Dr. Drake's Panacea. It is mild and safe but certain and effications in its operation, and cannot possibly injure the most delicate constitution. PRILA., Dec. 14th, 1847.

DEAR SIR:—in reply to your question respecting the use of Dr. Drake's Panacea, I will say, that although a perfect disbeliever in the existence of a Panacea, or cure for ALL diseases, however valuable it may be in certain conditions of the system, still I have believed that a cure for Consumption to the system, still I have believed that a cure for Consumption to the system, still I have believed that a cure for Consumption to the system, still I have believed that a cure for Consumption to the your medicine in two very investerate cases. They were pronounced by the attending physicians to be Primonant consumption, and alternated by them as in a curation of several very able practitioners for a number of years, and they said she had "old fashioned Consumption combine with Scrotinia," and that she might linger for some time, but could not be permunently relieved. In both cases, the effect of the Panacea has been most gratifying. Only four or five bottles were used by one of the persons before she began to improve rapidly. The other took about ten. I will only add that familiar as I am with consumption by inheritunce and by extensive observation as a study, and knowing also the injurious effects in nine cases out of ten of ur, boneset, and other vegetable tonics, as well as of many of the expectorants and schattves, I should never have recommended the use of Drake's Panacea if I had not been acquainted with the ingredients. Suffice it to say that these are I commencially the tase of the properties of the properties in accordance with a theory of Consumption broached in France a few years ago, by one of her most eminent writers on medicine, and now established by facts which admit of od dispute.

mit of no dispute.

Very Respectfully Yours, L. C. GUNN. To use the language of another, "Dr. Drake's Panacea in always solutary in its effects—never injurious. It is not as Opiate—it is not and Expertorant. It is not intended to full the invalid into a fatal security. It is a great remedy—a the invalid into a tatal security. It is a great remedy—a grand healing and curative compound, the great and only remedy which medical science and skill has yet produced for the treatment of this hitherto uncompared malady. And no person afflicted with this drawd discusse, will be just to himself and his friends, if he go down to the grave without testing its virtues. A single bottle, in most cases, will pro-duce a favorable change in the condition of any patient, however low.

TO THE LADIES.

Ladies of pale complexion and consumptive habits, and such as are debiliated by those obstructions which females are liable to, are restored by the use of a bottle or two, to bloom vigor. It is by far the lest remedy ever discovered for weakly children, and such as have bad humors; being pleasant, they take it. It immediately restores the appetite, strength and color.

Nothing can be more surprising than its invigorating effects on the human frame. Persons, all weakness and lassitude before taking it, at once become robust and full of energy under its influence. It immediate counteracts the nervelessness of the female frame.

AND A VARIETY OF OTHER DISEASES ARISING FROM IMPURITIES OF THE BLOOD, AND OR. STRUCTIONS IN THE ORGANS OF DI-GESTION.

Experience has proved that nearly every Dis ease originates from Impurities of the Blood or de-rangements of the Digestive Organs; and to secure Health, we must remove those obstructions or re-store the Blood to its natural state.

The aversion to taking medicine is most effetually removed by CLICKNER'S VEGETABLE PUR-DATIVE PILLS, being completely enveloped with a coating of pure white Sugar, (which is as distinct from the internal ingredients as a rut shell from the kernel) AND HAVE NO TASTE OF MEDICINE, But are as easily swallowed as bits of candy.

Moreover they neither nauscale or gripe in the slightest degree, but operate equally on all the dis-eased parts of the system, instead of confining themselves to, and racking any particular region. Thus, if the Liver be affected, one ingredient will operate on that particular organ, and, by cleansing it of an Excess of Bile restore it to its natural state. Another will operate on the B'ood, and remove all impurities in its circulation; while a third will effectually expel whatever impurities may have been discharged into the stomach, and may have been discharged into the stomach, and hence they straigs are the noat or hiskisk, remove all Impure Humors from the body; open the pores externally and internally; separate all foreign and observations particles from the chyle, so that the blood may be thoroughly pure—thus securing a free and healthy action to the Heart, Lungs and Liver; and thereby they restrain maintain. VEN WHEN ALL OTHER MEANS HAVE PAILED.

The entire truth of the above can be ascertained by the trial of a single box; and their virtues are so positive and certain in restoring Health, that the proprietor binds himself to return the money paid for them in all cases where they do not give Retail Price, 25 cts. per Box.

> ERVSIPELAS, on ST. ANTHONY'S FIRE. This is an inflammatory disorder, always stiended with more or less pain. It proceeds from the feul, acrimentous humors lodged in the blood and fluids, settling on the Lm's and face, causing extreme pain and favers; all applications on the surface are worse than useless, as they only tend to throw the disease in some other part, and perhaps throw the disease in some other part, and perhaps cause death. Bleeding is likewise improper. To cure the disease you must get rid of the cause; only manage to get the foul humors out of your blood, and you will be well in a day. Dr. SWEET. SER'S PANACEA, a thorough purifier of the blood, will search out every impurity in the more remote perts of the body and expel it through the medium of the bowels.
